

alisyys

Pepper Robot

Pepper is the new interface for communicating, interacting and empathising with people. Can establish a natural dialogue and offer visual information via its tablet, giving man-machine relations another dimension.

Outstanding practical uses

Pepper for events and marketing

Artificial intelligence and technological innovation to garner users' interest, creating commercial opportunities and increasing brand recognition:

Gathering and digitalising leads

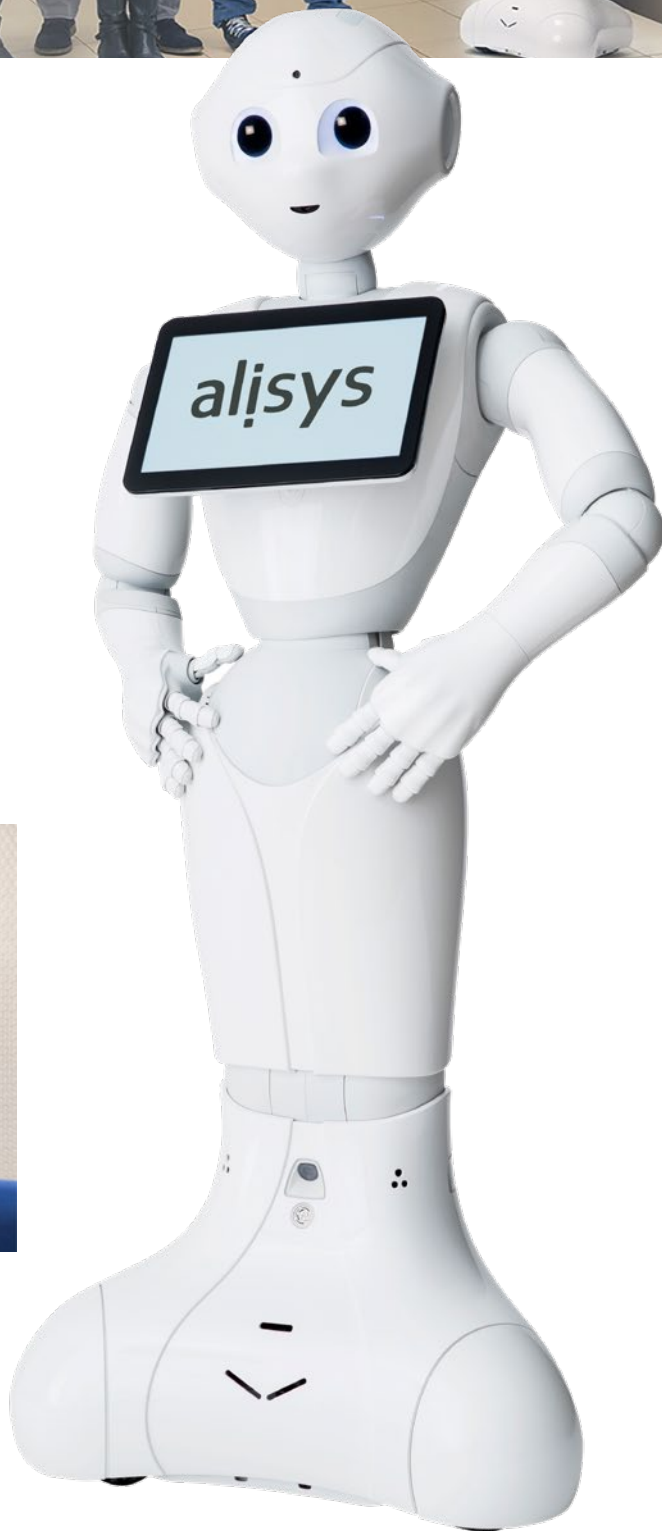

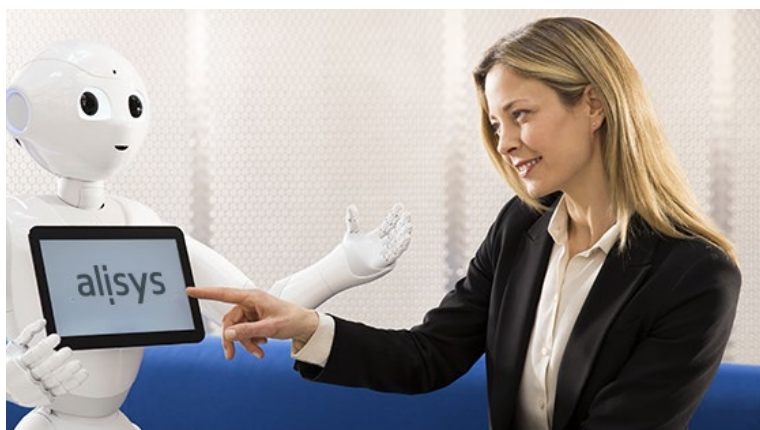

Integration with CRM, ERP, ecommerce or web

Brand ambassador at events

Competitions, promotions, coupons, etc.

Official Partner

 **SoftBank**
Robotics

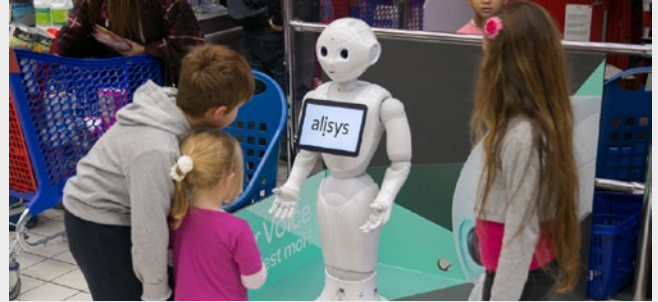

Pepper for business and customer service

Pepper speeds up and improves relations with clients, incorporating a new communication channel. It informs and talks to the public:

- Information point
- Point of sale promoter
- Greeting and assisting clients
- Voice dialling

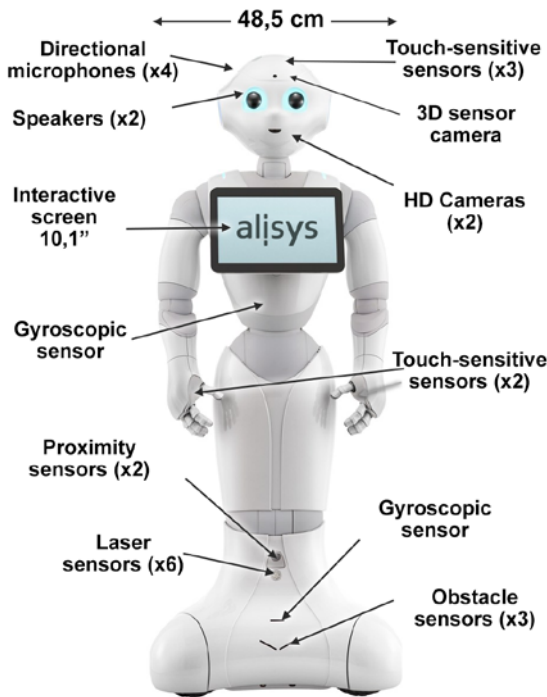

Pepper for educational and social uses

Pepper boosts the learning process and puts theory into practice. It piques students' interest thanks to its empathy and expressivity:

- Robotics campus
- Interactive classroom teaching
- Educational games
- Enhancing technological innovation

This is Pepper

How Pepper does it

As a partner of Softbank Robotics we provide personalized services, sale and provision of the Pepper robots.

- Pepper identifies verbal language and gestures
- Pepper empathises with users
- Facial recognition and response to emotions
- Natural, fluid and human communication
- Multilingual
- Pepper offers visual information via the Tablet embedded into its chest

Experts in artificial intelligence and Alisys Intelligence user experience evaluate the objectives and needs of each client to design and implement personalised services for Pepper.
